Syncwords Live provides embedded HTML Widget for a simple live captioning solution

Syncwords Integrated Widget for Live Event Platforms

The screenshot displays the Pheedloop event management dashboard. On the left is a navigation sidebar with the Pheedloop logo and a menu of options: General, Experiences, Registration, Attendees, Speakers, Sessions (highlighted), Exhibitors, Sponsors, Communications, Proposals, Data & Reports, and Advanced. Below the menu, it shows '3 / 50 User Credits'. The main content area is titled 'Event Portals' and has a 'Sync Words' settings icon in the top right. A sub-menu at the top includes 'Sessions' (selected), 'Schedule', 'Tracks', 'Feedback', and 'Settings'. Below this, there are 'Actions' and 'Create' buttons. A table lists sessions with columns for 'Title' and 'Date':

Title	Date
<input checked="" type="checkbox"/> Integrating captions into Pheedloop	2020-12-21
<input type="checkbox"/> Surviving on Mars	2020-12-20

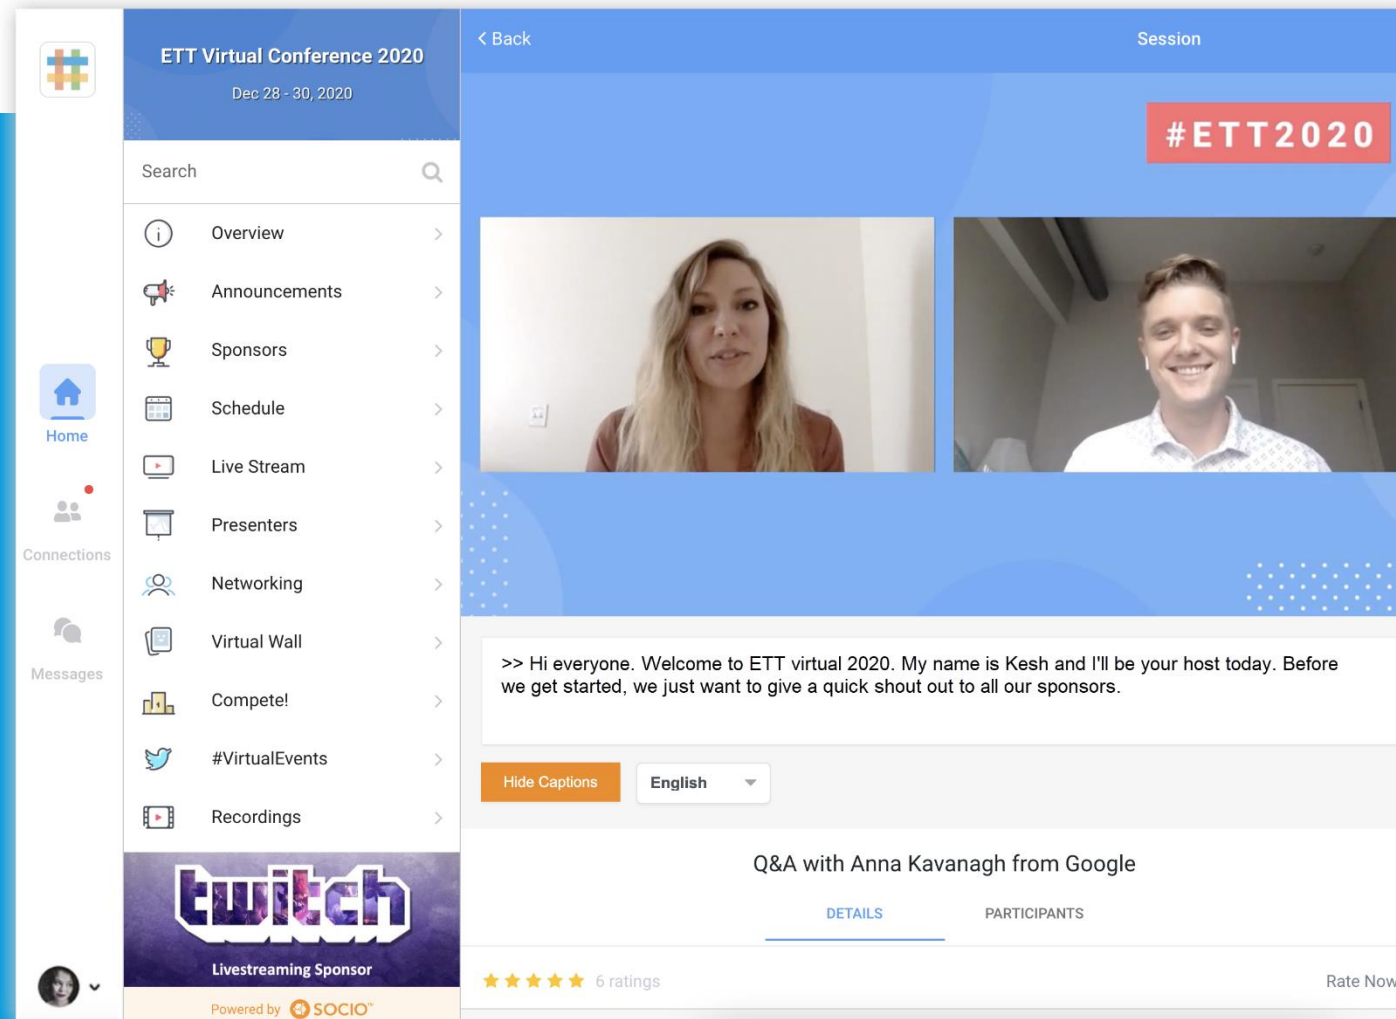

To the right of the table is a configuration panel for the Zoom widget. It includes fields for 'Custom Stream Code', 'Custom Engage Code', and 'Custom Captions Code'. The 'Custom Captions Code' field contains the following JavaScript code:

```
<script id="fw-js-options" type="text/javascript"> var recapdOptions = {"eventID":"21324","eventTitle":"WSJ CFO Summit","eventSubtitle":"","eventDate":"January 13th, 2021","eventDuration":"10:30 AM - 2:30 PM"}
```

Below the code are fields for 'Meeting/Webinar ID' (with value 83855533528), 'Meeting Password', 'Direct Link', and 'Phone Password'. A blue chat icon is located in the bottom right corner of the configuration panel.

Inclusion and Accessibility for Virtual Events

SyncWords embraces Inclusion and Accessibility for all Virtual Meetings as its primary goals, offering Captions and Multilingual Subtitles as the primary tools for achieving them.

- Provide an inclusive user experience for international participants
- Real-time translation of all captioning is available for every event.
- Scale new languages as needed
- Deliver translations to your event platform with custom widget
- Provide translated subtitles post-event

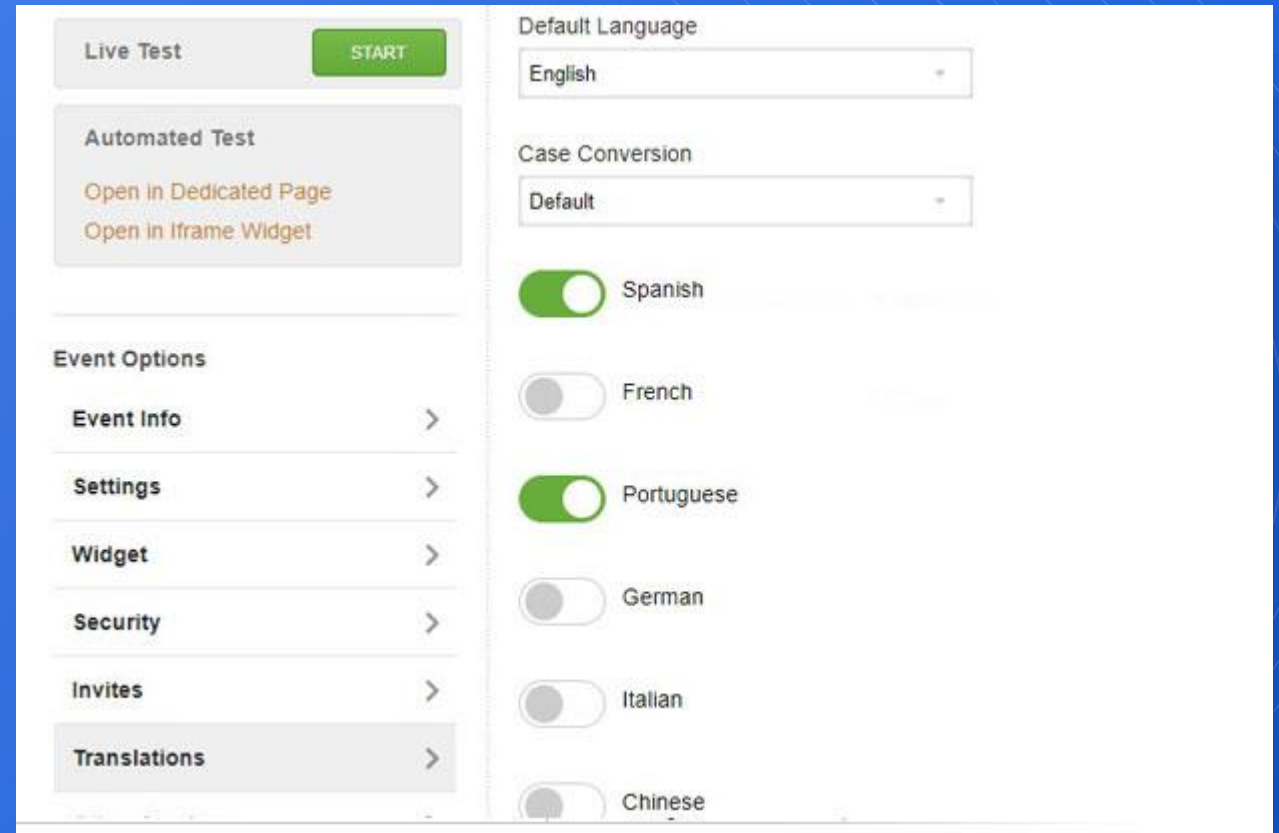

Automatically translate Live CC

Taking the live captioning created by an expert and leveraging AI machine translation.

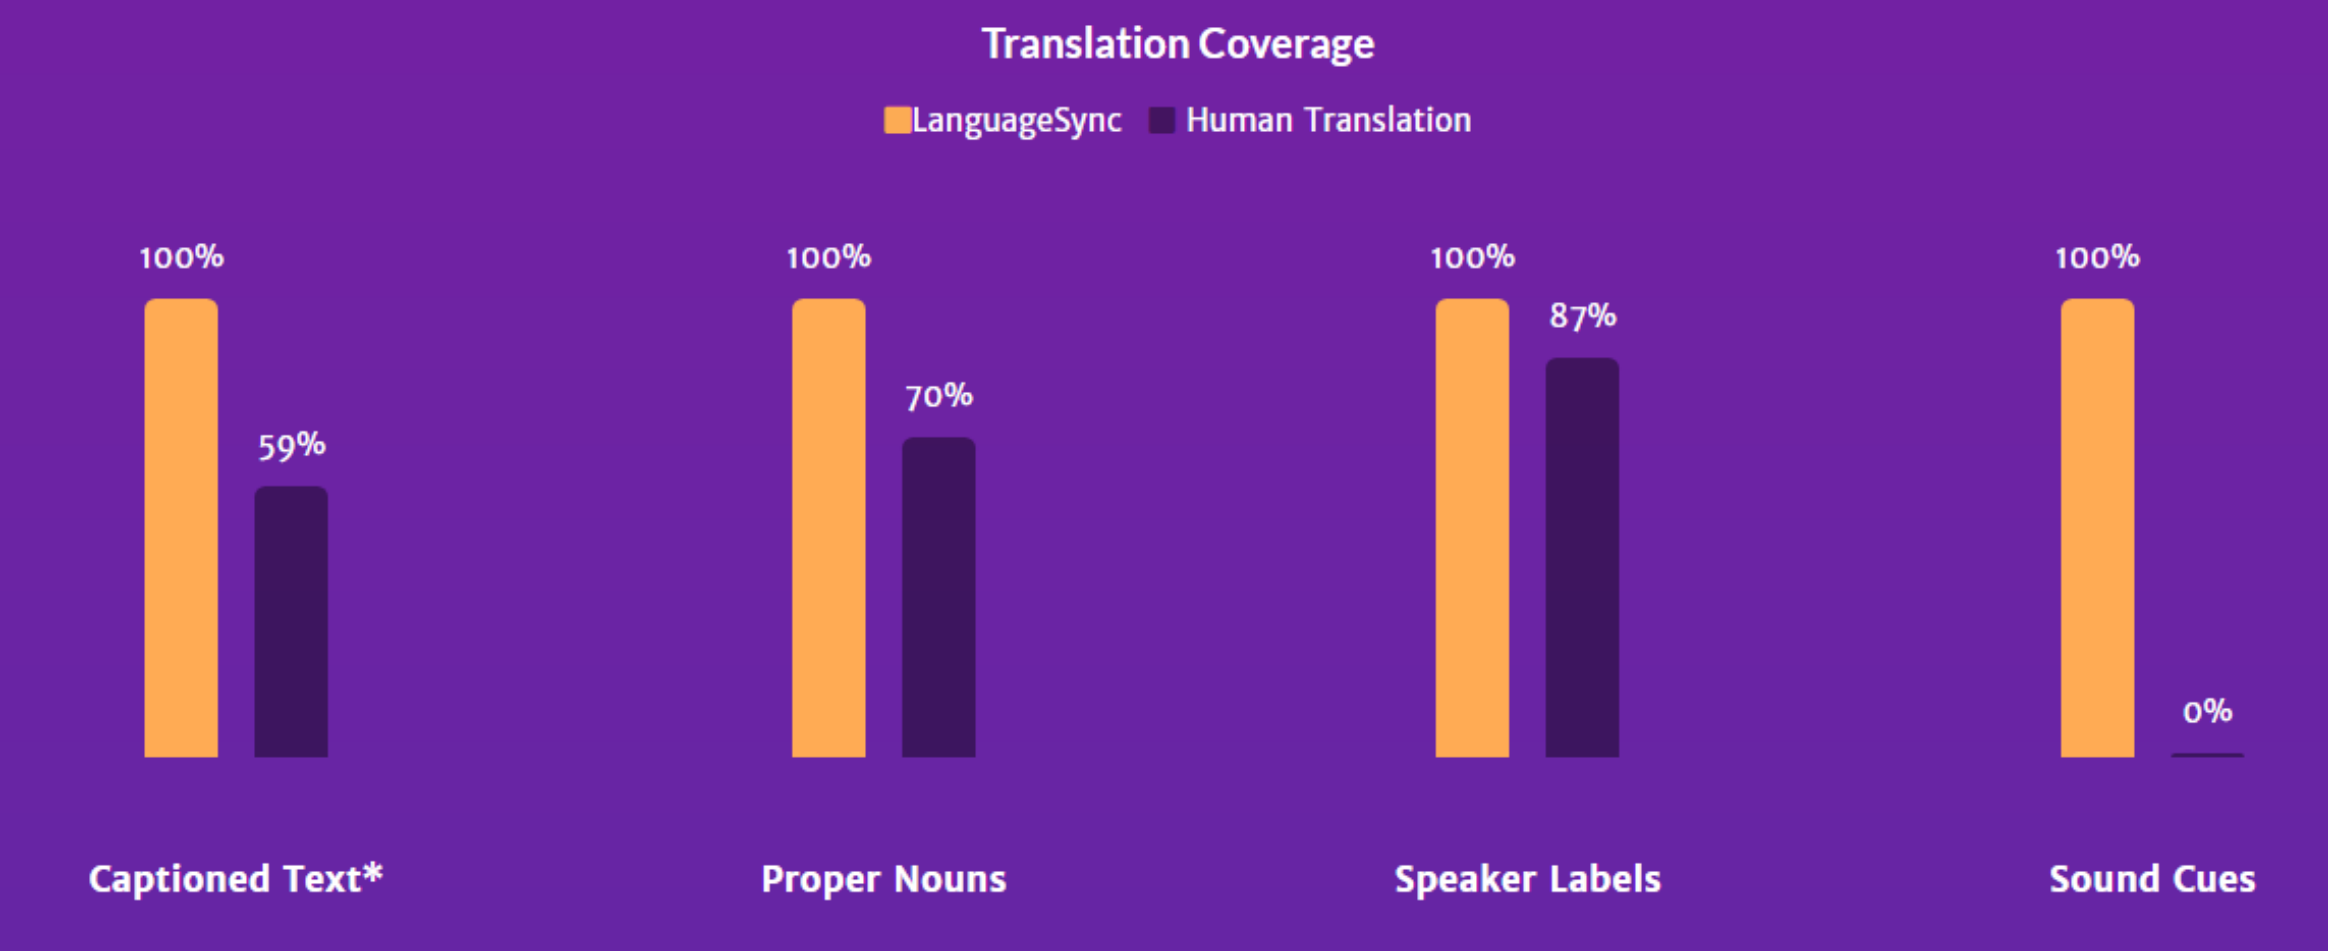

Spanish language real-time captioning supported and geared for Latin American market.

Real-time output to 60+ languages to help international viewers.

All captioned meetings can be localized to the language of choice for extended access.
